CORBEO

COTTON MANUFACTURING

MACRAMÉ
BAKER'S TWINE

Regenerated cotton

ECO-FRIENDLY

Corbeo produces its macramé with eco-cotton yarns, made of regenerated cotton. The wonderful colours are created by mixing different shades. This process provides us with the most sustainable twine on the market. Due to this recycling and production process, you may find traces of polyester in the cotton twine and colours may vary slightly from batch to batch. Taking the environmental impact of the production of virgin cotton into account, our eco-version will have a considerable positive impact on overall product sustainability.

PROPERTIES

- 100% recycled cotton
- Made of cotton waste (clothes, fabrics)
- Feels soft
- Durable
- Smooth and easy to tie knots
- Paper tube, easy to store

TECHNICAL DETAILS

- Resilience: minimal elasticity
- Moisture resistance: highly absorbent
- UV resistant: does not discolour or weaken with exposure to sunlight
- Oeko-Tex yarn: free from substances that could harm health or humans

Colour range

OUR COLOUR WHEEL**

*	Creamy/Natural
W	White
MSGRS	Mouse grey
GRS	Graphite grey
ZW	Black
BORD	Bordeaux
RD	Red
GL	Yellow
OKGL	Yellow ochre
MUS	Mustard
OR	Orange
TERRA	Terracotta
ZA	Sand
BR	Light brown
DOBR	Chocolate brown
EU	Eucalyptus
LIGR	Light green
MIGR	Medium green
FOR	Forest
DOGR	Green velvet
LIBL	Baby blue
AQUA	Aqua
BL	Azure blue
TUR	Ocean blue
MIBL	Royal blue
STO	Stormy
DOBL	Navy blue
BUB	Bubblegum
RS	Light pink
DORS	Deep pink
LILA	Light purple
PA	Purple

** Combination of colours is possible if quantity is big enough.
Made of regenerated yarns, so colour differences are possible.

PASSIONATE ABOUT BINDING

METALLIC THREAD

Our uniquely created metallic twines combine a metaloplastic (silver or gold) with our recycled cotton fibers. The result is a festive and very decorative twine. We are unique in our capabilities in creating larger diameters of this twine.

BAKER'S TWINE

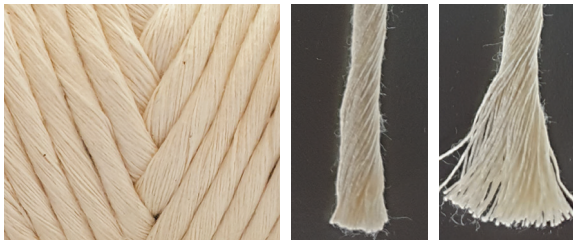

Our Baker's twines are made of regenerated cotton of excellent quality with a small portion of BCF yarn for additional strength. The classic baker's twine is made of red/white, blue/white or green/white twines and mainly used for tying packages or general household use.

Macramé twines

CONSTRUCTION

Our macramé is available in single and double twist. The double twist twine gives a very beautiful and strong twine or rope. The double twisting technique makes the product more firm. It is created by twisting three smaller strands together. The breaking strength of the double twisted macramé rope is higher and the length per weight is lower. The single twist twine on the other hand, is an ideal rope for making feathers and fringes. The difference between single and double twist is easily visible:

SINGLE The end of each strand unravels in fine yarns

DOUBLE The twine splits into strands instead of yarns

FROM 1 UP TO 10 MM

The single and double twisted macramé twines are available in natural creamy and in all the singular colours of our colour range in various diameters ranging from 1 mm up to 10 mm. As we produce the twines in-house any combination of colours, length and thickness are negotiable. Custom film and other conditionings are possible depending on order volumes. Our standard conditioning is a carton tube with shrink and Ledent-label. An alternative packaging is using a paper banderol. The size of the carton tubes varies with diameter and length of the twine.

Corbeo as key partner

5X AROUND THE GLOBE

Corbeo is a European manufacturer with the most comprehensive retail range in ropes and twines and a partner for many companies in different professional niches. With our expertise of more than 40 years, we master the complexity of the complete range of materials, production techniques and breaking loads. Our most sold products are based on raw materials like cotton, sisal, flax, polyamide and polypropylene. Our annual shipments of rope allows to encircle our globe at least 5 times. In recent years, major investments have been made in digitization and in-house production and we have made a shift towards local (European) added value. With a team of 30 employees, we manufacture and distribute more than 5.000 different rope SKU's.

Corporate Social Responsibility

OUR 6 FOCUS DOMAINS WITH TANGIBLE ACTIONS

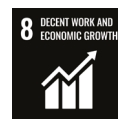

3 GOOD HEALTH AND WELL-BEING

Security audits and random workplace inspections • On-site working conditions • On-the-job training • Standard and documented processes • Employee wellbeing • Employee Happiness Committee

4 QUALITY EDUCATION

Internal and external training • Knowledge sharing • Language coaching of foreign employees • Providing internships and facilitating to school projects

8 DECENT WORK AND ECONOMIC GROWTH

Work/life balance • Ergonomic tools • Amfori checklist for supplier inspections - eg. no child labor - with active refusal to work with suppliers who do not comply

10 REDUCED INEQUALITIES

Collaboration with social workshops and prisons • Donation of our production leftovers to non-profit organizations • Inclusive company • Workplace learning • Encourage sustainable production supply chains • Flexible working hours

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Digitization • Waste recycling streams • Cradle to cradle products, eg. regenerated cotton or polypropylene from recycled propylene granulate • Guiding our customer to eco-friendlier solutions • Analyze our production waste streams

13 CLIMATE ACTION

Encouraging employee-commuting by bicycle • Electric cars • Solar panels • Energy efficient factory lightning • BEN label for energy efficient building • Decrease the ecological footprint
